

Re: Compliance with HEA Title IV, Part G, Section 485(i) – Fire Safety

Requires that the University issue an annual fire safety report including statistics on the number and causes of fires, number of fire injuries and deaths, and value of property damage. It must also include information on each on-campus student housing fire safety system, the number of regular mandatory fire drills, fire safety policies and education programs, and plans for any needed fire safety improvements. The statistical information must be submitted to the Secretary of Education as a part of the annual Clery Report.

- The Department of Public Safety has established information collection procedures to gather the required statistical information.
- The fire safety report is published as a separate section of the California Baptist University, Jeanne Clery Disclosure of Campus Security Policy and Campus Statistics Act report, issued annually, and includes information on each on-campus student housing fire safety system, the number of regular mandatory fire drills, fire safety policy and education programs, and plans for needed fire safety improvements.
- The University's Facilities and Planning Department annually provides updated information on systems in place, and updates on needed improvements to the Department of Public Safety for inclusion in the annual report.
- Residential Life has developed and implemented education programs to enhance fire prevention and safety.
