**Graduate Nursing Program Guidelines**

- Fill in the chart above with the equivalent prerequisite coursework you have completed.
- Submit a course description (a course syllabi may be required if further clarification is needed) for each prerequisite listed (from the school catalog for the year the course was taken).
- Official transcripts with grades posted must be provided for all prerequisite courses prior to acceptance to the program.
- You can apply to the program at any time, however deadlines apply (check website under FAQ’s).
- Prerequisite courses must be completed with the grade of “C” or better.
- There is no recency requirement. Prerequisites may have been taken in any year.
- Students may test out of some prerequisite courses by taking a CLEP or DANTES examination. If this is the case, please indicate in the “Institution Name” section.
- Science coursework must be completed in a classroom facility; online or wet labs are not accepted (except for BIO153)
- Some courses listed above may require other prerequisites prior to enrollment (see course descriptions on page 2).
- This is an unofficial evaluation until the coursework is approved and signed by a representative from the College of Nursing.
- Prerequisite courses may be available in CBU’s Traditional Undergraduate (day-time) program and the Degree Completion program (evening); tuition costs vary.
Abnormal Psychology
PSY346  Abnormal Psychology
Study of the dynamics, cultural implications and prevention of abnormal behavior including neuroses, psychoses, character disorders, psychosomatic reactions and other abnormal personality patterns. Textual and lecture attention will be given to the impact of environment and oppressed populations in relation to abnormal behavior.  Prerequisite: Psy 213 (General Psychology)

Anatomy & Physiology I with lab
BIO 153  Anatomy and Physiology I with Lab (4)
Included are a general survey of human histology and the study of structure and function of organ systems of the human body, including the integumentary, skeletal, muscular, endocrine and nervous systems. Structure and function of sensory organs are also included in the course. Correlated by laboratory experience and demonstration. Lecture (3 units) and required laboratory (1 unit). Additional lab fee.

Anatomy & Physiology II with lab
BIO 163  Anatomy and Physiology II with Lab (4)
A continuation of BIO 153 (Anatomy and Physiology I). Included is the study of structure and function of the circulatory (blood, heart, blood vessels and circulation), lymphatic, immune, respiratory, urinary and reproductive systems. Lecture (3 units) and required laboratory (1 unit). Additional lab fee. Prior completion of BIO153 is recommended.

Human Microbiology with lab
BIO205  Human Microbiology with Lab (4)
A study of microorganisms with special emphasis on bacteria and viruses in the human environment. Lecture (3 units) and required laboratory (1 unit). Additional lab fee.

Intermediate Composition
ENG 123  Intermediate Composition
Continued practice in writing with emphasis on critical thinking, argument, analysis and interpretation of multicultural readings and other interdisciplinary expository materials. Includes the writing of a major research paper (or report) in addition to several shorter essays requiring various types of documentation. Fieldwork required. This course requires LiveText. Prerequisite: ENG 113 (Freshman Composition)

Interpersonal Communications OR Oral Communications
COM308  Interpersonal Communications
This class examines the dynamics of the two-person communication process. Students will study the development of self-concept, self-disclosure, perception, listening, and feedback as they affect the communication process. Non-verbal communication, attitudes, beliefs, and values will also be explored.

COM113  Oral Communications
This course is designed to introduce the process of public communication and to help develop and refine the skills of oral communication.

Lifespan Development OR Development Psychology
PSY 320  Lifespan and Development
Principles of psychological development from birth the senescence. Prerequisite: PSY 213 (General Psychology)

Organic & Biochemistry with lab
CHE112  Organic & Biochemistry for Health Sciences w/ Lab
A survey of Organic and Biochemistry topics with special emphasis on metabolic processes and applications to medicine and health. Lecture (3 units) and required laboratory (1 unit). Additional lab fee. Prerequisite: CHE 102 (Fundamentals of Chemistry)

Sociology (General) OR Cultural Anthropology
SOC213  Introduction to Sociology
A general introduction to the scientific study of human behavior in social settings. It includes major theories of human behavior in terms of culture, socialization, primary groups, stratification and social class, population, family, religion, and social change.

ANT225  Cultural Anthropology
A general survey of Cultural Anthropology as a social science, including cultural factors that affect human behavior. Topics include language, kinship, art, religion, subsistence, and cultural change.

Intermediate Algebra OR Statistics
MAT115  Intermediate Algebra
This course satisfies the math competency for the general education requirements. It will include instruction in the following areas: roots and radicals, quadratic equations and inequalities, graphing relations and functions, systems of equations and inequalities, and matrices and determinants.

MAT144  Introduction to Statistics
Mathematical theory and applications, development of formulae, principles of statistical decision theory, descriptive measurements, probability concepts, random variables, normal distribution, inferential statistics, sampling distributions, confidence intervals, hypothesis testing, chi-squared procedures, linear regression, and the use of computers in statistics.
