

- Prior to the Fall of 1st Year, candidates will need to complete several Python modules distributed upon acceptance. These modules will take 6-10 hours and assist with remedial coding using Python.
- Elective Courses can be personalized to the student. The elective schedule shown is for reference only and is located on the flowchart solely to indicate when the elective is being offered.
- Students may choose to increase their load during the first year and summer in order to reduce degree timing or lighten their load during the Thesis and Project phase.
