

Greetings,

It has come to our attention that several instructors are experiencing an issue in our Blackboard environment when they try to change the order of content items using the drag and drop feature. While we are working with Blackboard support to find a permanent resolution to this issue, there is a workaround that can be used.

This button located on the right hand side of the window will allow you to re-order the content. Select the desired item, then use the arrows to move it up or down the list. Press the Submit button when you are finished.

Please contact me should you have any further questions.

Sincerely,
Keith Castillo
